+63 956-918-7196 | GMA, Cavite

Education

Cavite State University Carmona, Cavite
Bachelor of Science in Information Technology *August 2018 – April 2023*

Experience

Software Engineer August 2023 – Present
Software Ventures International – Software Service Corporation *Ortigas, Pasig City*

- Built and enhanced a mobile-first Authentication and Single Sign-On (SSO) platform, enabling secure and responsive access across devices and applications.
- Integrated SSO with KYC Onboarding, KYC Viewer, SSO Administration, and Role-Based Access Management applications, supporting identity verification, user and access management, application integration, and secure onboarding workflows.
- Contributed to the modernization and development of a loan origination and credit information system by translating legacy business processes into a modern React and Spring Boot architecture, improving its foundation for scalability and future enhancements.
- Developed credit card batch-processing programs that load, encrypt, validate, and transmit customer KYC data to banking clients, improving the reliability of credit-card decisioning and onboarding workflows.
- Enhanced an employee timekeeping system with biometric clock in/out, shift scheduling, swap requests, and responsive mobile interfaces for attendance and leave management, improving accessibility and streamlining employee timekeeping workflows.
- Improved the payroll system by updating BIR, SSS, and HDMF reporting templates, enhancing 13th-month pay processing, and implementing version tracking to improve compliance and auditability.
- Integrated Keycloak-based role management into an HR file and access management system, centralizing authorization and strengthening secure access control.
- Developed a government transaction-processing module supporting multiple transaction types, validation workflows, and downstream batch processing, improving data accuracy, processing reliability, and operational efficiency.
- Automated bulk uploads and exception reporting for a dealership management system while linking customer and vehicle records, improving data consistency and reducing manual data handling.
- Mentored programmer trainees as a Instructor and Panelist, strengthening their understanding of usability, design practices, web services, and database integration through technical guidance and project evaluation.

Projects

Transaction and Operational Management System HTML, CSS, JavaScript, AJAX, Bootstrap, PHP, MySQL
FinTra – Financial Tracker React, HTML, CSS, JavaScript, TypeScript, Tailwind
Stratosense – Weather Tracker React, HTML, CSS, JavaScript, TypeScript, Tailwind
Kairo – Focus & Productivity Timer React, HTML, CSS, JavaScript, TypeScript, Tailwind

Skills

Languages Java, JavaScript, TypeScript, PHP, HTML, CSS, SQL, CQL
Frameworks & Libraries Spring Boot, React, Angular, Node.js, Bootstrap, Tailwind, SCSS, Jest, Playwright
Databases Cassandra, MySQL
Cloud & DevOps AWS(S3, EC2, ECR), Docker, Linux, Git
Software & Development Tools Keycloak, Solr, Postman, Visual Studio Code, Eclipse, Power BI, Cursor AI
UI/UX & Design UI/UX Design, Wireframing, User Flows, UML Modeling, Layout Design, Figma, Whimsical, Canva, Photoshop
Project Management & Collaboration Jira, Confluence, Microsoft Teams, Agile/Scrum
Leadership & Professional Skills Technical Leadership, Technical Training, Mentoring, Communication, Team Collaboration, Requirements Analysis, Technical Documentation

Workshops & Seminars

React – The Complete Guide with React Hook Redux 2026
Kim Chen, Udemy, Inc.

Agile Scrum Master 2026
Tanmay Panchal, Udemy, Inc.

Decomposing Large System 2025
Software Ventures International

PHP Full Stack Web Developer Bootcamp 2021
Srinivas Vanamala, Udemy, Inc.

TechNow 2021: Web Dev Trilogy 2021
Exceed Philippines

DevFest 2021: Webinar Series 2021
Exceed Philippines & ALPHA

Engaging in a Community-Based Software Project 2021
ISTA – IT Education

Certifications & Achievements

Career Service Professional Eligibility – CSC 2023

Student Research Congress – Best in Thesis (BSIT) 2022
